Cultural Suggestions and Price List

♣ FEB 17 1923 ☆

THE COLORADO SEED CO.

The House for Quality 1515 CHAMPA ST., DENVER, COLO.

A Word of Appreciation and a Promise

IN PRESENTING our catalog for 1923 we wish, first of all, to thank our customers for their many orders, which are increasing our business rapidly.

We know when you order year after year that our seeds are meeting with your approval, and it stimulates us in our endeavor to give you the best seeds that money can buy.

In appreciation of your business we aim to give you at all times the best seed obtainable, and to handle your orders in the most efficient manner. Please feel that we want you to succeed with our seeds and we will help you with any of your garden or farm problems if you will write us.

Your orders will be greatly appreciated.

A satisfied customer is our best advertisement, and to carry out this precept we aim to send this catalogue only to localities where we know satisfactory results will be produced.

Compared with many seed books our catalogue is conservative, yet you will find listed herein practically every variety of seeds, bulbs and plants for which there is demand. Aside from listing the most improved varieties of garden seeds, this book gives such cultural directions as will aid the small city gardener to make an intelligent selection.

When in doubt make your selection from those items listed in CAPITAL LETTERS.

Tested Seeds

We have a practical testing system and thus know the germination and purity of each variety we offer. We also procure the pedigree of each variety as far as possible. Thus we comply with the Pure Seed Laws and are determined to give satisfaction. If any of our Seeds, Bulbs, Poultry Supplies or other goods are not as we represent them, we will consider that you are doing us a favor by telling us about it.

ONE REASON For the efficient service we are rendering which Mr. Root has devoted to serving the Western Gardener and Farmer. He knows your problems and solves them by furnishing you with seeds of proper varieties and of best quality.

MR. C. R. ROOT

President and General Manager, The Colorado Seed Co., who has served the Western gardener for 33 years.

About Prices

Supply of standard varieties is reasonably abundant this season; however, cost of production is still excessively high, notwithstanding we have made very important reductions in prices, especially for Garden Seeds in suitable quantities for Market Gardeners and large planters as shown on page 13.

Where seeds are priced 10c for one ounce we do not sell half ounces. If price for one ounce is 15c we give one-half ounce for 10c.

Our Prices Will Save You Money on an Average Order

Postage Prepaid On all Vegetable and Flower Seeds, Bulbs, Plants, etc., unless otherwise stated. The U. S. Mail delivers our seeds direct to your door. For Grass, Grain and Field Seeds, also other goods that are not priced "prepaid," see Parcel Post Schedule.

Our Specialty is Seeds in Bulk

Remittances
small amounts
Better not mail coin. If we cannot fill your
order we refund the amount. Please use our
printed Order Blank when possible.

That's the height of our ambition, and we will go to extremes to make all transactions satisfactory; but you know that there are many causes why good seeds do not always make good crops, owing to weather, heat, cold, insects and other reasons beyond the control of planter and seedsman. We, therefore, cannot guarantee the crop nor give any warranty, express or implied, as to their growth, description, quality or productiveness; and we will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned in the original, unbroken package, and the purchase price will be refunded.

If any seeds do not prove as represented

If any seeds do not prove as represented by us we will replace with more or other seeds.

We always give extra seeds free with mail orders for packets, ounces, etc.
Yours for success,

The Colorado Seed Company

ORROOK.

President

Convenient Location 1515 Champa St.

Main 5203 Denver, Colorado

ABOUT POSTAGE

We pay postage on all Vegetable and Flower Seeds, except as priced on page 13.

We do not pay postage on Grass, Grain or Field Seeds, nor on Nursery Stock, such as Trees, Small Fruits, Shrubs and Climbers unless stated otherwise.

We do not pay postage on Poultry Foods and supplies nor Garden Tools, Sprayers, etc.

THE PARCEL POST rates are as follows: Owing to the convenience of having mail brought to your door by the rural delivery system, it is well to take advantage of the low rates.

20 pounds anywhere within the city limits of Denver for

20 pounds one hundred and fifty miles, 24c; and 1c for each additional pound up to 70 pounds.

Nothing heavier than 50 pounds may be mailed farther

than 150 miles in one package.

ZONE RATES—When it is required that postage be added to the purchase price of any commodity, note the distance you are from Denver, see in which Zone you live. It is then easy to estimate the exact amount of postage required or ask your postmaster.

FOR PARCELS WEIGHING 8 ounces OR LESS, containing seeds, bulbs or books only, the rate of postage to all zones is 1 cent for two ounces or fraction. (Over 8 ounces the parcel post rates apply.)

When computing the cost of articles by Parcel Post please consult this schedule:

A Word About the Home Garden

THE average Home Gardener does not appreciate how valuable his garden is and how much it saves on the grocery bill. The most essential requirement of a successful garden is to plan it properly and if this is done there is little work. Choose the best varieties of seed and we assist you in this by listing the best in CAPITAL LETTERS. Plant your seed correctly and at the right time and follow the directions we give you herein. Cultivate well. The young weed is easier to destroy than the old one. Destroy the insects.

At any time we can help you by giving advice, call on us.

Plan your garden now and enjoy eating peas that will melt in your mouth, sugar-flavored tender corn, cool, crisp cucumbers, meaty tomatoes and other delicious vegetables, fresh right from your own garden. You'll enjoy and take pride in growing such vegetables as can be grown from our good seed.

Start Your Garden in Winter

Start your garden as soon as you get this catalogue. That does not mean to start digging with a spade, but to start on paper. Plan in advance. A little of this indoor gardening will enable you to have fresh vegetables throughout the summer. By referring to the chart on page 15 of this book, and to the diagram herewith, you will see how the same ground will grow two or three successive crops.

In planting, try to grow such things as are best adapted to the space you have. Plants of slow growth which occupy much ground—such as melons, cucumbers, squash, etc.—should be avoided in the small garden.

Likewise care should be taken to keep plants of high growth which cause heavy shade—such as corn—away from small sunloving plants.

Plant What the Family Wants

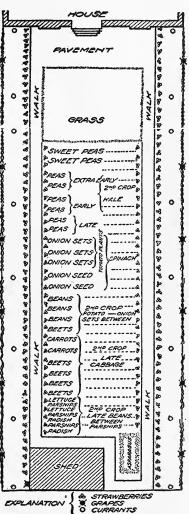

Many times you want a sprig of parsley or a cluster of mint, some sage or other herb, when it is impossible to get them from your vegetable man or corner grocery. These are easily grown and should find a place in every garden.

Plan Early

The diagram on this page gives you a fair start on your plans. Get a sheet of paper, draw off the place to suit your own conditions, then lay out the rows on a small scale, say 1/4 inch equals 1 foot.

By referring to the Planting Tables on pages 14 and 15 you can make your garden produce successive crops.

In the plan shown on this page all vegetables are planted in rows from the inside lateral rows of strawberries. As rapidly as each kind of peas mature and the crop is over, kale is planted in its place. The ground to be used for tomatoes is first planted to onion sets and these onions are used as rapidly as needed. When the time comes to set out tomatoes, some of the onions are dug to make space for the tomato plants. When the tomato crop is over, the ground is occupied by spinach as the third crop. Spinach is also planted as soon as the bulb onions from the side are gathered. The beans and peas are succeeded by late cabbage. Late onion sets can also be planted. Late beans are planted between the rows of parsnips.

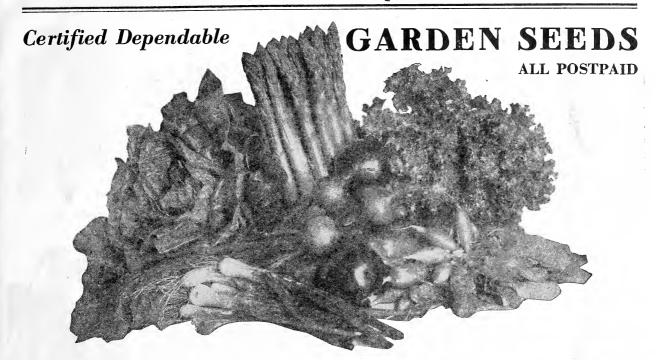

Plant Dependable Seeds

"Dependable Grade" is the trade-mark under which most of our seeds and several of our poultry food mixtures are sold. While we endeavor to have all our seeds, bulbs, plants, etc., dependable and equal to representation in every respect, we have from time to time procured exceptionally choice strains of seeds which we put out "Dependable Grade"

Plant One or Two Fruit Trees and Some Strawberries. These are Easy to Grow and Yield Year After Year When Once Started

For your convenience we have put the leading varieties in CAPITAL LETTERS. If you are in doubt, this will help you make a satisfactory selection.

Brittle Wax Beans

BEANS, GARDEN—DWARF

Bush Beans should be planted about the last of May. The furrows should be at least two feet apart. A pound of wood ashes should be hoed into every ten feet of furrow, leaving the furrow not more than an inch deep. Plant the Beans four inches apart in the furrow and cover them with an inch of soil. They come up in from 8 to 10 days, and the plants mature in from six to nine weeks. Thorough tilling is essential; the ground must be kept soft. Thin the plants out to about five inches apart. Avoid handling or touching the vines in damp weather.

When Bean Beetles trouble, pick off all you see and use Arsenate of Lead.

POLE BEANS

Prepare the ground for Pole Beans exactly the same as for Bush Beans. The poles should be set up firmly, three feet apart, and five beans planted around each pole an inch deep, in a circle. Do not heap the earth around the pole; keep it flat. It is believed best to plant Limas with the eye down. They then come up quicker. They mature a

week or two later than bush beans.	Pkt.	⅓-Lb.	Lb.

Kentucky Wonder Beans

Gradus Peas

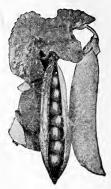

PEAS

2 lbs. will sow 100 feet

The furrow for Peas should be four inches deep. Sow the seeds 1 inch apart and cover with one inch of fine soil, thus leaving part of the furrow unfilled above them. This is to be filled gradually with fine soil as the plants grow, until the furrow is filled level with the ground. By this method, the sun can warm through he soil to the roots. Peas can be planted as soon as the frost is out of the ground; the rows should be two and a half feet apart. Plant the climbing varieties near a fence and train them on wire netting netting. We pay all postage on Peas.

SWEET CORN

1-2 lb. will plant 100 feet

Corn should be planted to the north of the garden, so as not to shade the other crops. It should not be planted in a very small garden unless it is the only crop to be raised. It needs shallow but continual tilling. Just after the middle of May is a good time to plant. The rows should be three feet apart, the kernels sown three together every six inches in the furrow. When the Corn is well started, pull out all but one stalk to each place. Keep the little shoots or suckers cut from around the roots. The ears are ready to pick when the silk is brown and the kernels on the tip are plump. Do not molest the ears of growing corn; it is liable to spoil them.

We pay all postage on Corn.

ASPARAGUS

One ounce for 60 ft. of row.

Asparagus is a slow grower, requiring at least three years to mature from seed, and is therefore not generally recommended to the small gardener. Usually unless one owns his home it is not a profitable undertaking, and we would recommend, unless you go into asparagus raising on a large scale, that you get the roots in preference to trying to raise from seed. ARTICHOKES—French

One ounce will produce 500 plants. For Jerusalem Artichoke tubers, write us.

BEETS—Table Varieties

Two ounces for 100 ft, drill.

The rows in which Beets are planted should be a foot apart. Along each row, in a furrow or small trench one inch deep, drop the seeds one or two inches apart; then cover with fine soil, pressing it down firm. Beets should be planted some time between the first of April and the first of June; they will be from a week to a month coming up, according to the weather. When the plants are about four inches high thin out to from three to four inches apart. The plants pulled up can be planted elsewhere. Strip their outside leaves off, and put the plants in holes deep enough to keep the roots from turning up Beets should be ready for eating in from eight to twelve weeks. Keep the ground loose and well tilled and well tilled. ¼-Lb.

WITLOOF (Brussels), true French Endive and very best variety	.05	. 25	. 75

CABBAGE

3 ounces seed to 100 yards of row. 1 ounce will produce 2,000 plants.

The best way to raise Cabbage in the small garden is from the plants. Cabbage requires an abundance of both moisture and tilling. It is also advisable to enrich the ground if possible. Fertilizer may be conserved by placing a small amount under each hill before plants are set. It will pay you to set out both early and late varieties. Set early Cabbage 18 inches apart in rows and two feet apart between rows. Late Cabbage two feet apart in rows and three feet apart between rows.

Pe-Tsal is a distinct vegetable from our common cabbage. It grows upright, leaves are tied together to bleach. Resembles Romaine or Cos Lettuce. Pkt., 5c; oz., 40c.

When troubled with bugs, worms or lice on cabbage and cucumber, dust the plants

with Nico-Garden Dust, 8-oz. package, 40c. (Poison—cannot be mailed.)

CUCUMBERS

One ounce will plant 50 hills. Two pounds will plant an acre.

Dig holes at least five feet apart. They should be a foot wide and five inches deep. Fill each hole to within an inch of the top with equal parts of sand and well-rotted stable manure thoroughly mixed. Scatter at least ten seeds in it, well apart, and cover them with half an inch of fine soil, pressing it down. From the middle to the last of May is planting time. Thin out to three plants to a hill. Our seed is all Colorado grown. Pkt. Oz. 4-Lb.

CARROTS

Two ounces for 100 ft. drill.

Furrows for Carrots should be fourteen inches apart and from a half-inch to an inch deep. The seed can be sown from mid-April to mid-May; it should be sown rather close, as Carrots do not germinate very well. Thin the plants out to four inches apart when they are four inches high. Soil for Carrots should be particularly well tilled before they are planted.

CELERY

Three ounces of seed to 100 yards of row. One ounce will produce 7,000 plants.

Three ounces of seed to 100 yards of row. One ounce will produce 7,000 plants.

Celery, to be raised from the seed, requires almost expert care. It is better for those who are not practiced gardeners to buy Celery plants. These are set out about the first of June, a foot apart, and mature along the last of September or during the first two weeks of October. Celery is by nature a marsh plant, and the soil about it must be kept wet, especially when the plants are young. When they get to be about four inches high, shear off the tops; it makes the plant more stocky. As the plants grow, gradually draw the earth up around them to keep the stalks white; by the end of fall all should be covered but the tops. A heavy paper wrapped around each stalk will insure tender, white plants. Keep the ground well loosened and cultivated; this is imperative on account of the moisture required by the plants. Celery is planted in rows that should be at least three feet apart.

LETTUCE—All Select

One ounce for 100 ft. row.

One ounce for 100 ft. row.

Lettuce will stand slight frosts, and is therefore one of the first things to plant, if the ground is well prepared; early April is not too soon. It can be planted up to the middle of July, and many prefer the later plantings. Place seed in trench half an inch deep, cover with fine soil to top of the trench and press the soil down. The plants should be up in about a week. If head varieties are wanted, thin out to four or five inches. The heads are usually well formed in ten weeks and should then be cut or they will rapidly go to seed, especially in hot weather. The rows of lettuce should be at least a foot apart. The quality of the lettuce depends on the tilling—keep the hoe busy. A special cultural leaflet on Lettuce Growing in Colorado free.

COLORADO SEEDS ARE BEST

TOMATOES

One ounce will produce 1,500 plants; h lb. to transplant for one acre.

Tomatoes are planted indoors in a window garden about the first of March. When the third leaf of a plant has formed, put the plant into a three-inch pot or box. After all danger of frost is over the plants may be set in the ground. Do not plant Tomatoes within three feet of any other crop. Dig holes three feet apart and deep enough to allow placing the plant an inch or two deeper than it was in the pot. Cover the top of the pot with your fingers, holding the stem of the plant between them; then turn the pot upside down, tapping it with a trowel or other tool, when the plant will easily come out. Place it in the ground, pressing fine earth around it; if the earth is dry, water it as soon as the plants are set. Some people, before transplanting Tomatoes, put a narrow ring of heavy paper loosely around the plant, just at the top of the soil, to keep off cutworms. June 1st is the usual time for transplanting in northern latitudes. Tie the growing plants to stakes. We will have plants ready in May and June.

Pkt. Oz. ½ Lb.

Book: Tomato Culture, 150 pages, illustrated, 90c, postpaid.

TURNIP

Plant Turnips between the first of May and the last of July, in rows a foot apart. A quarter-inch of soil is enough to cover the seed. The plants should be thinned out to about five inches apart. Late Turnips are generally considered the best. They should be taken out before the first heavy frost in the fall, and can be packed in boxes of sand

to keep all winter.	Pkt.	Oz.	¼ Lb.

THE GARDENERS' CALENDAR

FOR EACH MONTH OF THE YEAR

January
The month of planning. Study your seed catalog. Make your garden and flower-bed on paper, then order your seeds. Note carefully the height, time of blooming and color of each plant. Examine fruit trees for tent-caterpillars. Infected twigs should be cut off and burned.

February
Trees should be moved in February and March.
Cuttings from geraniums and other plants for
summer bedding should be made. If seeds of certain perennials
and biennials are sown in boxes, some of them will bloom this summer.
The seed-boxes should be covered with a wet cloth and supplied
with gentle heat from beneath.

March Plant sweet peas on St. Patrick's Day. Remove covering gradually from bulb-beds and perennials as the weather becomes favorable. All pruning should be finished before the sap rises. Sow seed of some of the old-fashioned flowers indoors this month to be set out May 15 to June 1.

month to be set ou	o niaj 10 to sano 1.	
Ageratum Asters Marigolds Pansy	Pinks Petunias Salvia Snapdragon	Stocks Verbena Zinnias

April This is the gardener's busy month. Plant shrubs and trees while still dormant. Dahlia roots may be separated and started in damp sand. Gladiolas, for early blooms, may be planted outdoors toward last of the month. Hardy plants such as pansies, may be transplanted from the seed-boxes to the open border and hardy annuals, such as candytuft and mignonette, sown outdoors. All seeds listed for March if not already sown may still be sown in boxes, also the following:

Alyssum	Coxcomb	Phlox
Calendula	Larkspur	Salpiglossis
Cosmos	Nicotiana	Sweet Sultan

Sweet peas may still be sown out of doors.

May All the hardy plants are now up and the winter covering of fertilizer should be worked in about them. All except the most tender seedlings may be bedded out and the sowing of annuals finished. After May 15 the following may be sown:

Bachelor Button	Cosmos	Petunia	
California Poppy	Marigold	Poppy	
Candytuft	Morning Glory	Portulaca	
Chrysanthemums (An.)	Nasturtiums	Sweet Alyssum	
	corn and cucumbers	and melons till last	o
month.			

Cutworms and slugs appear in May.

June
Finish bedding the tender seedlings, the geraniums, coleus and cannas. Dahlias should all be planted by the first week and a second planting of gladiolas made. Stake plants liable to break, and make trellis for sweet pea vines. Keep the hoe busy and use the sprayer freely.

July Keep after the weeds and insects. (See insect table 15.) Plant perennials for next summer's bloom. The lowing are easily grown:

August Keep seed pods and fading flowers cut. Set out your Iris bulbs or divide the old clumps if they are crowded or old. Oriental poppies are now dormant and may be moved. Occasionally flood your dahlias with water and mulch lawn with clippings.

September Killing frosts often come this month. Dahlias, after the tops are blackened. The following early-blooming perennial plants should be put out in September Make your selection from the special catalog you will get this month:

Bleeding Heart	Fox Glove	Larkspur
Canterbury Bells	Hollyhocks	Peonies
Columbine	Iris	Phlox

Hardy ferns and a few very hardy shrubs may be moved with safety. Among them are:

Bush Honeysuckle	Lilacs	Japan Quince
Bridal Wreath	Snowball	Spireas

The following bulbs are indispensable in the early garden and should be liberally planted after September 15th. Hardy Lilies Hyacinths Daffodils Tulins

October All tender plants, such as geraniums and coleus, must be potted for house culture. This is the best winter squash and ple pumpkins, placing in cool cellar.

November Hardy Japanese bulbs are not available until in November. These four should find a place in every garden. Save a place for them:

Tiger Lily Rubrum

The following may be potted indoors and some will be ready for Christmas:

Amaryllis Calla Lilies Cyclamen Oxalis Paper White Narcissus Hyacinths

Mulch with straw, manure or leaves the asparagus and rhubarb beds. Place dry leaves over all the perennials.

December A few plants in the living-room make it bright and cheerful. Some of your bulbs can be brought into bloom now, especially Paper Whites.

PLANTING TABLE FOR THE HOME VEGETABLE GARDEN

					,				
Kinds	Suitable varieties.	Times of planting for best results.	Time to first maturity (days)	Distance between plants (inches)	Distance between rows (inches)	Number of seeds to sow per foot	Amount of seed for 100-foot row.	Depth to plant (inches)	
	Stringless Green Pod,								
BEANS	Golden Wax Egyptian, Early Blood	May-June	50- 70	3-5	24–36	8-12	½ pound	1-2	For successive crops, sow every two weeks.
BEETS	Turnip Early Winnigstadt,	April-June	60- 90	2-3	12-18	20-40	2 ounces	½-1	Sow early varieties every two weeks. Use when small and tender.
CABBAGE PLANTS		April-June	45-100	18-24	24-30		1 packet	3-1	Put collars on plants to protect from cut-worms.
CARROT	Danvers, Oxheart	April-May	60-100	2-4	12-18	30-60	1 ounce	3-1	For continuous crop, sow bi-weekly.
CAULIFLOWER	Long Green, White	April-June	60-100	18-24	24-30		2 packets	½-1	Cauliflower needs cool, moist soil in order to mature.
CUCUMBER		May-June	65- 80	24 hills	36-48		½ ounce	½-1	It is best to cover vines early in season with mosquito netting to protect them from de-
CORN, SWEET	Golden Bantam, Evergreen Big Boston, Hanson,	May-June	70-100	18-24	36-42		1-1 pound	1-2	positing eggs on the vines. Plant every two weeks for successive crop. Lettuce can be planted in seed boxes indoors
LETTUCE, HEAD		April-May	40- 90	4–10	12-18	10-15	1 ounce	1/2	in April and transplanted when weather permits. Protect plants from mid-day sun
LETTUCE, LEAF		April-June	30- 70	3–6	12–18	10-15	1 ounce	1/2	in hot weather.
MELON (Cantaloupe)	Kleckley Sweet,	May-June	90-100	48 hills	60		1 ounce	1/2-1	Plant as soon as ground is thoroughly warmed or start in seed boxes indoors.
MELON, Water	Gypsy Yellow Danvers,	May-June	100-110	60 hills	96		1 ounce	1-11/2	Can be sown indoors in March. For trans-
ONION, Seed		April-May	100-140	2-4	18-24	20-40	1 ounce	3-1	planting cut tops a third and roots a quarter.
ONIONS, Sets	100	March-June	25- 40	2-3	12-18	6-8	1 pound	1 .	Onion sets are preferable where large onions are wanted.
PARSNIP	Alaska, Gradus,		120-140	3-4	18-24	20-30	1 ounce	1/2-1	Much improved if kept in ground through winter. Give mulch.
PEAS		April-June	50- 70	1-2	24-36	12-18	$1\frac{1}{2}$ -2 pounds.	2-3	The late crops are subject to mildew if given too much water.
PUMPKIN	Scarlet Turnip W. Tip.	May-June	100-120	48 hills	72-84		1 ounce	1	Plant when ground is warm or start in seed box.
RADISH	Icicle, Chartier Large Leaf Viroflay.	April-June	24- 35	1-2	10-18	6-10	1 ounce	1	Crops mature in 25 days. Successive planting every week.
SPINACH	Long Standing Crookneck,	March-June	30- 45	2-4	12-18	20-30	2 ounces	1/2-1	Sow seed thickly.
SQUASH, Early	White Bush	May-June	65- 80	36 hills	36-48		1 ounce	1-1	Dust leaves with lime or nicotine to keep
SQUASH, Late	Hubbard, Delicious Purple Top Strap	May	90-110	48 hills	72-84		1 ounce	1-11/2	squash bugs away.
TURNIP		May-July	50- 90	2-4	12-18	20-30	½ ounce	3-1	Do not plant later than August 1st. Use while young.

Varieties marked for "hills" should have three or four healthy plants left, all weak plants removed.

Egg Plants, Peppers and Tomatoes can be most profitably handled by purchasing the plants of suitable size for setting out in May and June. Special cultural advice on any crop or variety will be cheerfully given on application.

INSECTS AND PLANT DISEASES—HOW TO FIGHT THEM

Plant enemies are of two kinds—insects and diseases. The former are of two kinds, (a) insects which chew or eat the leaves or fruit; (b) insects which suck the juices therefrom. Plant diseases also are of two kinds, (a) those which result from the attack of some fungus or germ; (b) those which attack the whole organism of a plant and are termed "constitutional." The remedy to be used must depend upon the nature of the enemy to be fought. The matter can be reduced to the following classification:

PLANT ENEMIES

INSECTS EatingSucking.	Clas a b
DISEASES Parasitical.	С
Constitutional. REMEDIES	ď
MECHANICAL Covered boxes. Collars. Cards.	No. 1 2 3
DESTRUCTIVE

White grub	Plants	ā	4.

FOR PRICES ON INSECTICIDES, SEE PAGE 36.

By using this table the gardener will be able to tell at a glance the method of fighting any enemy the presence of which is known or anticipated. The list is formidable, but most of the pests mentioned probably will not appear.

Many Denver gardeners report the destruction of tender young plants by the cut worm. The cut worm is perhaps the most annoying of all garden pests. He works at night, attacks the strongest and healthiest plants and is content simply to cut them off, seldom eating much. The quickest and best remedy in small gardens is hand-picking. The worms may be found at night with the aid of a lantern, or early in the morning. In daytime they can be found by digging about the soil wherever cut worm work is found.

One of the best methods where only a few plants are put out is to protect each by a collar of heavy or tarred paper.

FLOWER **SEEDS**

The Prices Quoted This Year are a Real Inducement to Lovers of the Flower Garden

WE PAY POSTAGE ON ALL FLOWER SEEDS

The flower seeds listed in our catalog are specially selected for hardiness and duration in the territory where this book is sent.

There are none of the undesirable varieties. When you order seeds from this book you can rely on getting only dependable seeds

For your further guidance and to make the results of your efforts more certain you will find cultural directions on the packet.

Flowers are usually known as Annuals, Biennials and Perennials.

Annuals bloom and ripen seed the first year and then perish.

Biennials do not generally bloom the first year and are in perfection the second year only.

Perennials flower several years in succession, many blooming the first year from seed sown early and are used for permanent plantings. See Gardener's Calendar on page 14. For price list Perennials, see page 22.

Hardy Perennials and Biennials may be sown either in early fall or spring and require no protection through the winter. Hardy Annuals may be sown either in late fall or spring. They often selfsow in the fall.

Haif Hardy Annuals, Biennials and Perennials cannot be sown in open ground until warm weather; they may, if desired, be started early inside and transplanted afterwards. The latter two need protection in winter or may be carried through in cold frames or

Ageratum

In this list we include both annuals that bloom, then die, and several tender perennials that bloom freely the first year.

ASTERS

The Aster is the queen of the summer blooming plants. Unlike many of the old-time flowers, the Aster has progressed and improved by cultivation until many of the new varieties in their improved form bear such a striking resemblance to the Chrysanthemum that one can scarcely tell them apart. The long stem makes them desirable for cut flowers as the blooms last long in water. The popularity of the Aster is not due entirely to the flower, but to the ease with which they are raised. Asters thrive in any good soil, prepared the same as for a crop of vegetables. Any extra care taken in the preparation of the soil and cultivation is repaid by larger and more beautiful flowers. They require a sunny exposure and a well enriched soil. Sow in hotbeds, pots or boxes in the house in March and April, transplant 18 inches apart after danger of frost is past. The seed can be sown in open ground in May.

(Snapdragon)

In buying flower seeds it pays to buy the best. You will find our strains above the average.

ASTERS—Continued

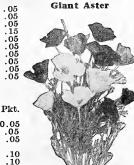

Giant Branching, or Crego, our stock is grown and carefully selected at the Bodger Farm where "Asters are Kings." They are improved to be very large, well branched, and on long stems. For home gardens they are next in quality to the New American Beauty type. Supplied in seven distinct colors.

California Poppies

Save Money and Wasted Effort by Preparing Right NOW

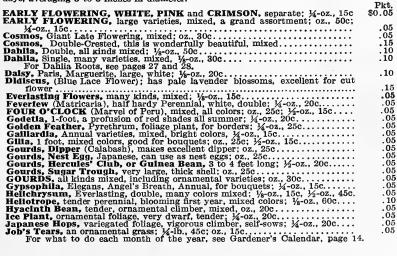

Cosmos

T is wise to get your order in early! It is easy to neglect ordering until planting time comes all at once. Then out of necessity you fly to the grocer as a last resort—pay fancy high prices for skimpy package seeds that may be several seasons old. The result is a poor stand, puny plants, slow growth and inferior yields. Don't make this mistake this year.

COSMOS

A gorgeous, tall growing annual, bearing its thousands of graceful flowers during the latter part of the summer and fall till frost. Its large single, pink, crimson or white flowers waving on their long stems amidst the finely cut foliage are a lovely sight, and few plants are equally valuable for cut flowers to decorate with. They grow five to six feet high, and are admirable for hiding unsightly fences. Seed should be sown in open ground in early May, or may be started in cold frames and transplanted to the open. We recommend for Denver the Early Flowering, in separate colors, which bloom from seed in 60 to 70 days, averaging 3 to 5 inches in diameter.

NASTURTIUMS

Few plants are so well known, useful or so rich in color as the Nasturtium. They surpass all other annuals in brilliancy of color and profusion of bloom. They being of easy culture, require a moderately good soil and a well drained sunny position. Will produce within a few weeks after sowing, until a hard frost comes, a profusion of brilliant colored flowers the entire season. The varieties offered below have been selected with great care from a very large variety of sorts as being the best and most distinct.

DWARF OR TOM THUMB KINDS

These are specially suited for bedding, and planted in rows will make beautiful sights when in bloom. Crop of Dwarfs is short this season. Beauty, scarlet splashed with canary, green leaves; oz., 20c, ½-lb., 60c.

PANSIES

Pansies are too well known to require any description, as they are favorites with all. For best results you must start with a good strain. The finest Pansies are, as a rule, shy seeders, which accounts for the difference in the price of the various mixtures effected.

Steds should be sown in hotbeds or boxes, then transplanted in open ground after hard freezing is over. If this manner of planting is followed, plants will bloom early the first season.

the first season.

As soon as the plants are up and large enough to handle, they should be thinned out or transplanted to stand 9 inches apart in the rows. Thorough cultivation should be given from the start, as Pansies will not thrive when obliged to share the beds with a mass of weeds. It is a mistake to plant Pansies in the shade of a tree or building. An open exposure where the wind has free sweep over the bed is far better, and Pansies so planted are free from the long, straggling branches which produce few and inferior flowers. During dry weather the bed should be watered daily, and in extreme cases twice a day for the best results.

Pansies are successfully grown from seed even by the povice; however, we would

PETUNIAS

A garden without these favorites could hardly be called complete; there are few which equal them for effect. They commence blooming in July if sown outside in May, and continue to flower in great masses until destroyed by frost. Their culture is the most simple; any soil seems to suit them, while of course, a good rich earth adds greatly to the richness of color. The various strains which we offer have been obtained from specialists, and we are confident that they will give satisfactory results. For early blooming sow early in the house and cultivate in small pots or flats till the weather has settled.

SWEET PEAS

Selected Tested Seed

Champion Mixed Sweet Peas

Spencer Mixed Sweet Peas

Sweet Peas with their beautiful varied colored flowers take the lead among the many different kinds of annual and perennial plants. Your flower garden will not be complete without them. There are many varieties which are identical and others which lack size, color or some other characteristic, which all first-class sorts should have. We offer herewith a list of varieties which have been carefully selected for their large size and marvelous colors, and every variety is entitled to a place in the front rank of Sweet Peas

The seed should be sown as soon as the ground can be worked, in trenches 8 to 10 inches deep in a position fully exposed to the sunlight and air on both sides of the row. Cover with about one inch of soil, pressing it down firmly As the plants grow, draw the soil to the plants until the trench is full. This method will give a long vine in the soil, which will make innumerable roots and gather nourishment and moisture through a dry spell. As soon as they are above ground, thin out to 2 to 4 inches apart to enable the plants to fully develop if you desire large flowers. They should be staked up either with branches of brush or stout stakes on which wire netting has been fastened. These should be at least 4 feet high. During dry weather water thoroughly and frequently The flowers should be cut as often as possible to prevent the plants from running to seed which stops them from continuing to bloom. Cultural leaflet free on request.

Our prices have been greatly reduced and we pay all postage.

OUR "DEPENDABLE" CHAMPION MIXTURE

Consists of the best named varieties, also many **Spencers**, all mixed by us. This mixture is decidedly different from others. We buy separately many named varieties and trial ground sorts to mix into this stock. There is positively nothing better in mix-

Large packet, 5c; oz. pkg., 15c; 2-oz. pkg., 25c; $\frac{1}{2}$ -lb., 45c; $\frac{1}{2}$ -lb. pkg., 75c; lb. pkg., \$1.35. All postpald.

SILVER MEDAL STRAIN

SPENCER VARIETIES MIXED SWEET PEAS

Too much cannot be said in praise of the merit of this mixture. We arranged with Mr. Waller, a very extensive seed grower in California, to supply us stock from his Silver Medal strain, which consists of many standard varieties of Spencers To this we added some separate varieties that there may be a well-balanced assortment of colors. All these make it far superior to these so-called mixed which are grown-mixed and only a few colors prevail. Our mixture is a very distinct class. It simply can't be beat

Pkt., 5c; oz., 20c; 2-oz. pkg. for 35c; ¼-lb. pkg., 60c; ½-lb., pkg., \$1.10; lb., \$2.00.

STANDARD GRANDIFLORA VARIETIES

All are large flowering and best of their class. The Grandiflora named varieties are of good colors and have many distinct shades. They are excellent for planting in quantities where color effect is wanted. Sow liberally for fence lines, etc. You will be pleased. Dcrothy Eckford, white: King Edward, red; Janet Scott, pink; Othello, dark maroon, Lady Grisel Hamilton, lavender; Lord Nelson, blue; Captain of Blues, purple; Primrose, salmon-yellow. In 1 oz. pkgs., each, 10c; six 1-oz. pkgs. for 50c.

GRANDIFLORA MIXTURE

A good stock of numerous colors, grown mixed by a prominent California grower.

Oz. pkg., 10c; 2-oz. pkg., 20c; $\frac{1}{2}$ -lb. pkg., 35c; $\frac{1}{2}$ -lb. pkg., 60c; 1-lb. pkg., \$1.00; all postpaid.

Fine Bone Meal, applied on surface of ground and worked in, is very beneficial to Sweet Peas. Lb. pkg., 10c; 5-lb. pkg., 30c; 10-lb. pkg., 50c; not postpaid.

BURPEE'S SPENCER SWEET PEA NOVELTIES FOR 1923.

Among tnese new varieties we have selected for our customers the following Spencers: Burpee's Lilac Pink. A charming combination of salmon, amber and pale filac-pink on cream ground, rather difficult to describe. Sealed packet of 12 seeds, 25c.

Burpee's Fordhook Orange. Deep rich salmon, heavily suffused with bright orange. Entirely new shade. Sealed packet of 12 seeds, 25c.

Burpee's Honor Bright. A true fixed type of deep rose-pink on cream ground, with blotch of buff on base of standard and wing. Sealed packet of 20 seeds, 25c.

SPENCER SWEET PEAS

The Spencer or Butterfly varieties are the latest and best in Sweet Pea culture. Most of them have frilled edge like illustration, and many are hooded shape. All are very large and usually four blossoms on a long stem, making them excellent for bouquets. We are leaders in this market for quality seed and dependable varieties. We give free a special leaflet on Sweet Pea Culture when asked for with order. Nitrogen Bacteria for Sweet Peas, 20c and 40c sizes.

NAMED SPENCER VARIETIES

This list includes the very choicest of the popular varieties. There are many similar kinds in Sweet Peas with attractive names, but you cannot go amiss in planting any of the following. The stock is all from reliable growers in California who grow on contract for leading seedsmen. Our prices are very reasonable for the grades we supply.

Any following separate varieties:

Packets, 5c; 1/2-02. pkg., 15c; 02. pkg., 30c; 1/-lb. pkg., 90c; 1-lb. pkg., \$2.85.

APPLE BLOSSOM—The standards are very bright rose, wings primrose with flesh of rose tint. Very large blossom and very free bloomer. A bi-color flower similar to Blanche Ferry.

APPLE BLOSSOM—The standards are very bright rose, wings primrose with flesh of rose tint. Very large blossom and very free bloomer. A bi-color flower similar to Blanche Ferry.

ASTA OHN—Best lavender Spencer grown. Comes remarkably true, producing the elegant, bold, wavy flowers in greatest profusion.

CAPTAIN OF THE BLUES—Purplish maroon standard and bluish purple wings with veins of rosy purple make this exquisite sort one of the finest purplish blues. Well waved and crinkled.

CONSTANCE HINTON—Large true Spencer white blossom. Being black seeded it generates the property of the pr

waved and crinkled.

CONSTANCE HINTON—Large true Spencer white blossom. Being black seeded it germinates more readily than white seeded. Extra vigorous grower.

COUNTESS SPENCER—Of perfect form, remarkable size and exquisite color, being a soft rosy pink. One of the best pinks on the market. Flowers are 1½ to 2 inches in diameter, charmingly waved and fluted.

ELFRIDA PEARSON—This old favorite is a lovely pink throughout, the buds and flowers being tinted with salmon pink with the margins a darker pink.

FLORENCE NIGHTINGALE—Very large, finely waved of rich bluish lavender, enlivened by a very faint sheen of rose-pink. A much admired variety.

ILLUMINATOR—A rich glowing cerise-salmon with an indication of bright orange suffusion, which glistens under bright sunlight. The flowers are well formed on long, stout stems.

suffusion, which glistens under bright sunlight. The flowers are well formed on long, stout stems.

KING EDWARD SPENCER—The largest and best scarlet to date. Wings are carmine-scarlet, reverse sides are rosy carmine. The blossoms are very large, three and four on a long stiff stem.

KING WHITE—Undoubtedly the best white now in cultivation. Is remarkable for its immaculate purity of whiteness and the perfect finish of the flowers. Almost invariably four blossoms on a long, stout stem.

MARIE CORELLI (Rosabelle)—While not a new variety, we retain it for its glowing crimson, the flowers of which are beautifully waved, and admired by many growers.

MRS. ROUTZAHN (Mrs. Hugh Dickson)—A beautiful blending of apricot, pink and straw color. The pink deepens to a rose near edges of wings and standard. There is no other variety just like io. Is distinct in its class.

OTHELLO SPENCER (Nubian)—The darkest color we can offer in Sweet Peas, being a deep velvety maroon of very large size and beautiful form.

PRIMROSE SPENCER (Dobbies Cream)—Both standard and wings are of beautiful soft primrose or creamy-yellow color. Flowers are in a class of their own in both color and size, being large and wavy.

SENATOR SPENCER—A deep claret or chocolate, striped and flaked on a ground of light heliotrope, makes a very charming combination. Blossoms are extra large, wavy and drooping, usually four on a stem.

THOMAS STEVENSON—Intense flaming orange. The wings are rosy carmine, shaded orange. Beautifully waved.

orange. Beautifully waved.

WHITE SPENCER—This old favorite of pure white is still one of the best whites for general culture. It blooms profusely, and is very dependable.

WEDGEWOOD (Blue Bird)—The best light blue, of a unique shade. The flowers are of good size, well waved and invariably four on a long stem.

BURPEE'S SPENCER NOVELTIES OF 1922.

Burpee's Giant White. A very perfect white. Sealed pkt. of 30 seeds, 15c. Burpee's Floradale Purple. Rosy-purple of great merit. Sealed pkt. of 30 seeds, 15c. Burpee's Scarlet Duplex. Rich glowing scarlet. Sealed pkt. of 30 seeds, 15c. Burpee's Sunset. A beautiful soft rich rose. Sealed pkt. of 30 seeds, 15c.

EARLY FLOWERING OR WINTER FLOWERING ORCHID SPENCER SWEET PEAS

These are a distinct strain of Spencer type flowers that bloom fully three weeks earlier than other Spencers. The original purpose in breeding up these varieties was for winter blooms in greenhouse, which has made wonderful change in sweet pea culture indoors. It was soon discovered that these same varieties would do equally as well in our garden by producing fine large blossoms considerably in advance of other strains. Thus it is we recommend them for garden culture as well as for florists indoors.

Per pkt., 10c; ½-0z.,25c; ½-0z., 40c; oz., 75c, unless otherwise priced.

EARLY ASTA OHN—A very desirable lavender, the color being same as Asta Ohn

BLANCHE FERRY—Has the combination of bi-colors as in the ordinary

EARLY BLANCHE FERRY—Has the combination of bi-colors as in the ordinary Blanche Ferry, but larger and early.

EARLY BOHEMIAN GIRL—Deep pink wings; the standard is orange blush.

EARLY GOLUMBIA. Bi-color of pink and white.

EARLY FLAMINGO—A beautiful orange-red that is especially admired.

EARLY GLITTERS. Bright fiery orange, wings deep orange.

EARLY GRENADIER. Brilliant poppy-scarlet. Pkt., 25c; ¼-oz., 75c.

EARLY HARMONY—A fine new clear lavender.

EARLY HEATHER BELL—Rich mauve, changing to mauve-lavender.

EARLY HEATHER BELL—Rich mauve, changing to maup-proof crimson.

EARLY LIBERTY—Mr. Morse pronounces this a grand sun-proof crimson.

EARLY MEADOW LARK—Rich cream, well waved, duplexed.

EARLY MORNING STAR (Helen Lewis)— Deep orange scarlet with rich orange wings.

EARLY MRS. A. A. SKAACH—Bright shell pink, extra large and very much liked by the florists.

EARLY MRS. A. A. SKAACH—Bright shell pink, extra large and very much liked by the florists.

EARLY ROSE QUEEN—One of the best pinks and a leader in the flower shops.

EARLY SNOWSTORM—Pure white, large waved and extra long stems.

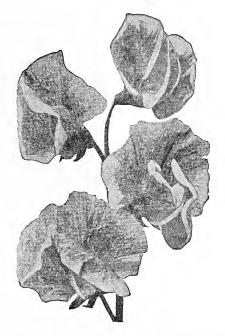

EARLY SONG BIRD—Soft pale pink with buff-white background.

EARLY SONGSTER—Giant waved lavender.

EARLY VENUS—White with blush pink wings.

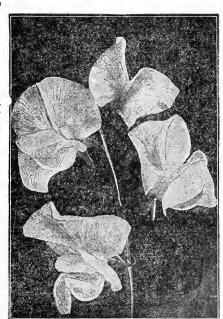

EARLY WARBLER—Rich mauve purple.

EARLY YARRAWA—Bright rose-pink, duplexed. This is the original variety introduced from Australia, being parent to many of the new race of early flowering varieties.

Colorado Dependable Brand Seeds

ARE ALL THAT THE NAME IMPLIES

These are the best seeds obtainable at any price; carefully selected as to variety, great care being exercised to keep them true-to-name and tested for high germination. They will prove their worth in your garden as on your farm.

The "Colorado" Strawberry

"Pride of Denver" Everbearing Strawberry

Strawberry

Plant Strawberries in April and May

We have excellent facilities for supplying goods in this line. Let us book your orders early and ship the stock as wanted. No extra charge for packing.

STRAWBERRIES

ALL POSTPAID EXCEPT BY 1,000

Strawberries are a hardy plant; they do well in almost any soil or climate and are almost entirely free from disease and bugs. Buy one-year-old plants and get them into the ground as soon as you can. Before planting, dip the roots in water. Set the plant with the crown or bud at the surface of the ground.

Everbearing varieties are now the leading kinds—in fact, so much can be said in favor of varieties that produce all through the summer and fall that we are discarding so-called standard varieties and offer everbearing varieties only.

For best results with Strawberries, give all-day sunshine and apply nitrate of soda or fine bone meal fertilizer in June.

THE "COLORADO"—Everbearing

A few sample plants of this variety were distributed last season. The reports confirm the originator's statement that this variety is the best strawberry in the Everbearing class. It is as near perfection as is possible. If it has any fault it is one we all admire. It is too prolific. The last week of last October we saw one plant with 200 berries and

Of course the supply is limited. However, the originator has requested that the mountain growers be urged to be especially interested and, thus to encourage same, \$25.00 cash will be given for the best and most perfect fruiting plant grown at altitude of 5,000 feet or more. Plant to be in a pot delivered at our store between September 15th and October 15th.

Price for Plants-Dozen, postpaid, \$5.00.

"PRIDE OF DENVER"—Everbearing

A strictly high-class large-fruited variety. Truly a Colorado product, being originated and introduced by Mr. G. W. Huber. We had the honor of naming this variety five years ago, and have no cause for regrets. We know of no more beautiful variety. Its growth during entire season is perfect. Its June crop alone is immense. Its full crop is larger. Unquestionably the best of the large everbearing sorts except the Colorado.

Prices for Spring, 1923 (postpaid): Dozen, 75c; 100 for \$4.00.

"PROGRESSIVE"-Everbearing

This desirable variety has been in cultivation in Colorado for several seasons. Is not a large berry but produces continuously until killed by hard freezing. A very profitable market variety.

Bunch of 25 plants, postpaid, for 50c; 50 for 85c; 100 for \$1.50; 1.000 plants, not prepaid, \$10.00.

SMALL FRUITS

NOT PREPAID. WHEN WANTED BY MAIL, ADD POSTAGE

These varieties are all of established merit and very suitable for our Western planters.

When shipping by express we can select the larger and stronger plants. Special Cultural Leaflet on Small Fruits free. Our stock is all examined by State Inspectors.

While we cannot guarantee every plant or tree to live, we do guarantee that each is in good condition when packed and shipped. Part of this risk is yours in giving proper care and culture. If ever there is a fault you think is ours, write us frankly; we will do our part. We must have our customers satisfied.

BLACKBERRIES

Hyacinths, Tulips, Narcissus and other Hardy Bulbs for fall planting are all described and priced in special catalog that will be ready in August.

CHOICE FRUIT TREES

Our No. 1 stock of Fruit Trees average too large to be handled by mail. Should go by express or freight. Purchaser pays transportation charges. We make no charge for packing. Cultural leaflet free.

Note greatly reduced prices for Fruit Trees.

APPLES

Grow more apples in your own yard. Plant several trees this year. Prices: All varieties, average No. 1, 4 to 6 ft. Each, 75c; 10 for \$7.00. DELICIOUS, true stock, large, dull dark red; very juicy; one of the best, GANO, very hardy and suitable for the West; a beautiful red color. GRIMES' GOLDEN, good size, golden yellow color; good keeper and shipper. GREENING, NORTHWESTERN, a popular winter variety, greenish yellow. JONATHAN, dark red color, medium size, extra quality; very popular. WINESAP, STAYMAN, large deep red; excellent keeper; best in winter. NORTHERN SPY, large, bright red and very hardy; quite late. RED ASTRACHAN, large, deep crimson, crisp and juicy; for summer only. YELLOW TRANSPARENT, white, tender; very early summer. SIBERIAN, CRAB, large red; exceedingly hardy; suitable for Colorado.

To keep your apple trees free from Leaf Roller and other leaf-eating insects, use Arsenate of Lead.

CHERRIES

The sour cherries do splendidly in the West, while sweet ones are seldom a success. Supply of No. 1 stock is still very limited.

Prices: All varieties, average No. 1 stock. Each, \$1.00; 10 for \$9.00. EARLY RICHMOND, clear, bright red, very early; quite acid; good canner. MONTMORENCY, late but large, best sour red; very hardy and productive. ENGLISH MORELLO, dark red, almost black, medium size; slightly acid.

If troubled with Cherry Slugs eating the foliage, use Powdered Hellebore.

PEARS

We do not encourage planting Pears in this part of Colorado. However supply the following popular varieties, 4 to 5 ft. Each, \$1.25; 10 for \$10.00. However, we can BARTLETT, large pyramidal shape; juicy and sweet; a favorite variety. CLAPP'S FAVORITE, large, pale yellow; best early for our climate.

Kansas Biack Raspberry

Downing Gooseberry

Concord Grapes

Grimes' Goiden Apple

Delicious Apple

Bartlett Pears

Abundance Plums

Orange Quince

Mulberries

PEACHES

The following freestone varieties do reasonably well in our lower altitudes. Stocks, are No 1, 4 to 5 ft. Each, 60c. CRAWFORD'S EARLY, large yellow, of excellent quality, EARLY ELBERTA, large, yellow; a leading market variety; quite hardy.

APRICOT

MOORPARK, the hardiest and worthy of corner of garden. Each, 90c.

PLUMS

Our varieties are suitable, even for the dry farmer's crops. All varieties of select trees, average 4 to 6 ft. Each, \$1.25; 10 for \$11.00.

ABUNDANCE, large bright red with yellow flesh; firm and sweet,

DAMSON, SHROFSHIRE, deep purple; fine for preserves; popular; very hardy,

IMPROVED WILD GOOSE, clear bright red, sweet and very judy, 10 for \$10.00

LOMBARD, oval violet, red, flesh yellow, good size; great bearer.

GERMAN PRUNE, large, dark blue, firm flesh; excellent for preserving.

OUINCE

Our two-year-old trees are 3 to 4 ft., well branched. Each, \$1.25. ORANGE, golden yellow flesh, good flavor; reliable; long keeper.

HARDY HEDGE PLANTS

NOT PREPAID.

We recommend only varieties that are hardy and thrive in Colorado. There really are but few varieties that are suitable.

PRIVET

The true AMOOR RIVER NORTH stock of Siberian variety, acclimated here, thrives and makes handsome hedge. Our stock is 18 to 24 in. See illustration at bottom of this page. Dozen, \$2.00: 100 for \$15.00.

The California Privet is not hardy in Colorado.

BARBERRY

JAPANESE THUNBERGIA, makes excellent low hedge and also fine for shrub; stock is 18 to 24 in. Each, 40c; dozen, \$4.00.

A limited number of shapely specimens, 2 to 2½ feet, each 50c.

COLORADO BLUE SPRUCE TREES

The most beautiful of all our native trees. Stock grown in this State is shipped to all parts of the U. S. Ours are mountain grown, carefully removed with a ball of native soil wrapped around the roots. Ready in October, also early April. Place orders in advance. Dozen lots, 10 per cent off.

Average about 24 inches tall, good shape; each, \$2.00.

Average about 36 inches tall, good shape; each, \$2.50.

Average about 36 inches tall, heavy, well shaped; each, \$3.00.

YOUNG BLUE SPRUCE TREES. We have purchased a supply of one and two year native seedlings from a mountain forester that will be ready in April. Better place your order in advance. Per dozen, \$3.60; per 100, \$25.00.

MULBERRY TREES

The Russian Mulberry of properly grafted stock produces good fruit, and usually in abundance, with but slight attention. Plant several amidst your orchard to keep the birds busy from eating other fruits. 8 to 10 ft., large and vigorous. Each, 65c; 3 for \$1.75.

Crawford's Early Peach

Lombard Plum

Shropshire Damson Plums

INSPECTION

Our Trees are all properly inspected by the State Entomologist and a proper certificate of inspection accompanies each shipment.

Burbank Canna

SUMMER BEDDING PLANTS

We supply from our store nearly all the popular and easily grown plants for bedding. On account of cost of production—greenhouse space, fuel and labor—we do not give prices here except for our specialties. Ask for new list to be ready about April 1 that will include Antirrhinum, Coleus, Daisies, Dracenas, Geraniums, Heliotrope, Lobelia, Marguerites, Petunia, Salvia, Verbenas, Vincas.

The following we have growing from select seeds that we recommend as being the best obtainable:

ASTERS

These plants are grown expressly for our trade from Bodgers' strain of Giant Branching Comet Aster seeds that is highly esteemed by many gardeners. We supply plants separately in colors.

White, Pink, Lavender, Crimson, Purple, Light Blue, ready in May and June. Per doz., 50c; per 100, \$2.50.

Average Mixed Colors, grown mixed. Per doz., 40c; per 100, \$2.25. If by mail, add 10c per dozen.

PANSY PLANTS

The seed is selected from certain selected plants and saved expressly for these plants, which were started last fall and now are in protected cold-frame beds, ready for coming out in bloom in April. Our stock is from the famous "Denver Giants" that are prizewinners. Best ever—none better.

Each plant is wrapped so that bloom shows; will keep nicely for days.

Per dozen, 50c; 100, \$3.50.

If by mail, add 15c per dozen. However, ship by express when possible.

TUFTED PANSY PLANTS.

This season we can supply plants from English seed. Very hardy and fragrant Per dozen, 50c. If by mail, add 10c per dozen.

SUMMER FLOWERING BUI

ALL BULBS UNDER THIS HEADING ARE PREPAID

GLOXINIAS

Are especially suited for indoor pot culture. We have secured a supply of bulbs from selected strains, mixed varieties. Each, 35c.

Cactus Dahlia

DAHLIAS

The Dahlia is one of the very satisfactory flowers for the home flower garden. The bulbs are inexpensive, almost sure to grow and produce most attractive flowers, lasting up to frost time.

Many of the newer varieties are wonderful in size and colorings, while every one in our list is of merit. We urge customers to add a few of the newer varieties. There are several classes of Dahlias, such as Show Dahlias, Peony-Flowered. Decorative, Cactus, Single and Pompon. We have included in our assortment some of each. You can get a very complete Dahlia garden planting from us.

Cultural Leaflet on Dahlias free for the asking.

STANDARD VARIETIES

Price: Each, 20c; 12 or more, all labeled, at \$2.00 per dozen, postpaid.

Show Dahlia

CHOICE CACTUS-FLOWERED DAHLIAS

Peony Flowered Dahlia

PEOPLE

ORDER NOW.

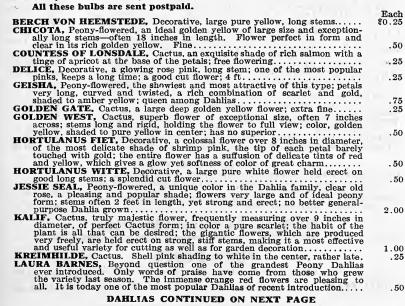

MORE THAN PLEASED WITH OUR DAHLIAS

TO KEEP DAHLIAS AS CUT FLOWERS

Cut the flowers late in evening or early in the morning, not during the heat of the day. Plunge the ends of the stems (an inch or two) in **hot water** for a few minutes, being careful to hold the blossoms to one side so they will not be injured by the rising steam. Then place in vase of cool water.

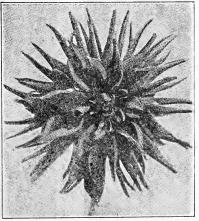

SPECIAL-MERIT DAHLIAS

In this list you get the very cream of choice varieties. The tubers are all properly labeled. Please do not judge the merit of the flower by the size of the bulb, since some of the very best are extremely small bulbs.

SPECIAL DOLLAR DAHLIA COLLECTION

Each season we have a number of bulbs Each season we have a number of bulbs of varieties that are so similar to others that we plan to discontinue, also there are some where labels become removed or lost. All these we sell at reduced prices by putting up assortment of 8 good bulbs in a box, all for \$1.00, postpaid. Why not order a box sent direct to some friend?

DEPENDABLE HARDY ROSES

Our two-year-old outdoor-grown dormant Roses are all from Western growers. Our two-year-old outdoor-grown dormant Roses are all from Western growers. Each plant is grown on its own roots, thus making them doubly desirable for Colorado. Roses on their own roots are worth two and three times the ordinary grafted stock. Varieties in capital letters are our very specials.

We pay postage on Dormant Roses.

Special Cultural Leaslet for Hardy Roses free.
Stock is ready in April and May.

Prices: Each, 65c; 5 for \$3.00, except where otherwise priced. Postpaid. When wanted by express, not prepaid, we can usually send larger plants.

REDS

AMERICAN BEAUTY (H. P.), bright crimson, the largest and sweetest of all hardy roses. Should be in every garden.

Francis Scott Key (H. T.), large deep red, excellent cut flower. Each, 75c.

GENERAL JACQUEMINOT (H. P.), a very free growing, brilliant crimson, with fine medium large blooms; outlives many other varieties.

GRUSS AN TEPLITZ (C.), richest scarlet, shading to a velvety crimson, fragrant, strong grower and one of best for garden culture.

HADLEY (H. T.). A rich crimson varying to a deep velvety crimson. One of the very satisfactory garden varieties. Each, 75c.

HOOSIER BEAUTY (H. T.), beautiful, well-shaped, long buds, a perfect flower of intense crimson scarlet. Each, 75c.

PINKS

COLUMBIA (H. T.), a beautiful true pink, unusually double with long, thornless stem. Each, \$1.00.
La France (H. T.), a standard variety of silvery rose color.
MRS. JOHN LAING (H. T.), soft pink of good form, exceedingly fragrant and free bloomer: always does well.
John J. L. Mock (H. T.), deep pink to cherry red; has long stems. Each, 75c.
Ophelia, delicate tint of salmon-flesh, shaded rose, on long stems.
Pink Killarney (H. T.), one of the best bright pinks. Admired by all.
Paul Neyron (H. P.), (Pink Karl Druschke), dark rose color of enormous size; considered the largest of outdoor roses; very hardy.

WHITE

FRAU KARL DRUSCHKE (H. P.), well called the White American Beauty. It is Frau Karl Druschke large, beautiful snow-white, superb, very best white for outdoors.

White Killarney (H. T.), pure snowy-white, very dependable.

YELLOW

Soliel d'Or (A. B.), beautiful orange yellow, very strong grower.
SUNBURST (H. T.), flowers are of medium size, color is a soft yellow with orange-yellow center; a very attractive rose. Each, 75c.

In addition to having the field-grown as described and priced above, we have engaged from the Roberts Rose Co. a big stock of truly Colorado-grown acclimated Roses that are at present in 4-inch pots. All ready to be taken out and wrapped ready for shipping. These are not dormant, instead are growing and some are in bud ready to bloom. We have seventy popular varieties including Hybrid Teas, Climbers and Baby Ramblers. Special printed list on application or send in your order and we can doubtless fill as specified.

PRICES: Single Rose for 60c. Dozen or more, one kind or assorted, for \$6.00. Customer pays all transportation charges on Colorado Grown Roses.

HARDY **CLIMBING** ROSES

TWO-YEAR-OLD, FIELD GROWN, DORMANT

Plant More Climbing Roses to Screen Unsightly Objects or Views

Crimson Rambler

For porches and arbors nothing surpasses these Climbers. They are everblooming and very hardy, growing to immense size when on a trellis.

When placing Climbing Roses, avoid planting on south of brick or stone wall. They suffer too much from extremes of heat and cold, often starve out for want of moisture and soil nourishment, invariably become weakened and take on mildew. East wall will do thought trellis to be to do, though trellis is best.

Prices: Each, 65c; 5 for \$3.00; all postpald.

CLIMBING AMERICAN BEAUTY, a true American Beauty, large red flower on a climber A remarkably beautiful climber, hardy and seldom mildews.

CRIMSON RAMBLERS (Excelsa), small bright crimson flowers in clusters. The most popular of all Climbers. Thrives under nearly all conditions.

Dorothy Perkins (Lady Gay), similar to Crimson Rambler, except in pink blooms.

White Rambler (White Dorothy Perkins), similar to above, only write in color. Tausendschoen (Thousand Beauties), flowers are in numerous clusters of soft pink, changing to carmine rose. Each cluster is a bouquet.

Ampelopsis Engelmanil

Climbing American Beauty Roses

Baby Ramblers or Dwarf Polyanthas Roses

Suitable for pots and border bedding, growing to 15 or 18 inches tall. All are two-year-old. Prices: Each, 75c, postpaid.

Crimson Baby Rambler, the very best crimson dwarf and is a perpetual bloomer. Pink Baby Rambler, a popular pink color and very satisfactory.

White Baby Rambler, the true dwarf type with a great profusion of small white flowers.

POPULAR CLIMBERS—Bulbs

POSTPAID

All do well in Colorado.

APIOS TUBEROSA (Tuberous Rooted Wistaria), deep purple wistaria-like flowers, perfectly hardy and increase from year to year; grows 8 to 10 ft.; each 15c; 2 for 25c.

CINNAMON VINE, small white fragrant flowers; green glossy, heart-snaped leaves; grows 15 to 20 ft. This season we have procured several thousand very select tubers, and urge our customers to plant liberally around fence, porch or arbor. Each, 10c; 12 for \$1.00; 30 for \$2.00; all postpaid.

KUDZU VINE, like the famed Jack-and-the-Bean-Stalk Vine; it grows quick with large leaves that cover big area; fine for old trees, arbors, etc.; perfectly hardy; select tubers, each, 50c.

tubers, each, 50c, leira Vine, waxy green leaves, fast growers if warm location, tender; small tubers, 3 for 15c; 12 for 50c; select large tubers, each 15c; 2 for 25c; 5 for 50c.

Japan Honeysuckle

HARDY CLIMBING VINES

NOT POSTPAID. IF WANTED BY MAIL, ADD POSTAGE.

GRASS SEED SOWERS—We carry an assortment. See p	age 40.		

TESTED SEED CORN—Not Postpaid

Most of our supply is Colorado-grown, and all is carefully tested for germination. Price: Single lb., 15c; 2 lbs., 25c; 10 lbs., 80c; 25 lbs., \$1.25. If wanted by mail, add postage. Ask for latest price on Corn Seed when you are ready to buy. WHITE AUSTRALIAN, 90-day flint, hardiest of all field varieties. SWADLEY, 90-day dent, kernels are yellow-white, ears blunt end, well filled. COLORADO YELLOW DENT, 90-day dent. A Colorado production that is a sure cropper, good size ear, reasonably safe on dry land.

MINNESOTA NO. 13, 90 to 95-day. Is similar in appearance to Colorado Yellow Dent; however, is a greater producer and highly recommended by our Agricultural College.

COLORADO WHITE DENT, 90-day, best white dent for Colorado, hardy. Corn Planter, Diamond Rotary, assorted discs; complete, \$2.75. Corn Planter, Acme, adjustable, old style but good; each, \$1.85.

SEED POTATOES

It is early to quote prices for large lots. Write us when you are ready to buy. Small lots we supply as follows, to be ready in April and May: 4 lbs., 25c; 25 lbs., \$1.00; lots we supply as follows, to be ready in April and May: 4 lbs., 25c; 25 lbs., \$1.00; postage extra.

EARLY OHIO, the popular pink variety, oblong shape, the most sure to do well in small gardens and on village lots.

RUSSET BURBANK, oblong, white skin, shallow eyes, netted; very mealy and fine for baking: heavy producer.

PEACHBLOW, or Red McClure, a good general crop variety, late.

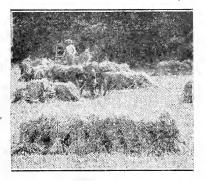

MAMMOTH PEARL, the standard, large white, excellent for dry land.

We expect to have a supply of Irish Cobbler, Bilss Triumph, also Colorado Dry Land Ohios.

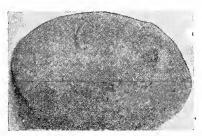

FORMALDEHYDE for use on potato seed. One pint bottle, 60c. 5-lb. can, \$2.50. A 32-page book, all about use of Formaldehyde free for the asking.

FERTILIZERS

DEPENDABLE LAWN FERTILIZER, our own formula, contains 5 per cent	
ammonia, 9 per cent available phosphoric acid, 2 per cent potash, with	
other valuable plant foods. Compare this analysis with any other brand.	
Ours is the highest quality; 100 lbs. covers 2,000 sq. ft. of lawn; apply in	
spring and early summer: 10 lbs., 40c; 25 lbs. 75c; 50 lbs., \$1,35; 100-lb. sack	\$2.50

POULTRY SUPPLIES

A Few of These Items Are Listed Postpald. However, Mof the Goods Are F. O. B. Denver, Purchaser to Pay Transportation.

INCUBATORS CHARTERS INCUBATOR

A double wall, hot water machine. Equipped with Charters Regulator. The only machine that eliminates the work of filling lamp and trimming the wick daily. Charters Shutter Burner is a positive lamp regulator. There is nothing like the Charters on the market. It is the most complete of any we have seen. Come in and see it in our store or write for complete descriptive catalog.

A chick is a chick while an egg is a chance. We have arranged with a large Denver Hatchery whereby we can supply all the leading breeds from dependable stocks, some are Hoganized Layers. You should plan your wants several weeks ahead and let us have your orders in advance, so that the little fellows may be gotten off the day after hatched. We ship in light, ventilated, non-crowding boxes, which usually go through satisfactorily. Out-of-town orders will be sent postpaid by Parcel Post. First hatches begin in February and then continue until in June.	Champion Dog Bread, a popular brand; 2 ½-lb, carton, 45c; 4 ½-lb, carton, 80c. Larger quantity in bulk; 10 lbs, or more at 12c per lb.; 50-lb, box for

CANARY BIRDS and BIRD SUPPLIES

Our birds are all strong and active. Every singer we sell has been tested and known by us as a singer. We cannot send out on trial or exchange birds. State the amount you wish to pay and leave the selection to us. The value of a bird is not in the plumage. All birds are graded as to singing qualities and range of notes.

Hartz Mountain Strain.

These are the popular singers and usually are mixed in plum-age. Considered the most vig-orous. Our domestic bred are orous. Our domestic bred are very healthy and satisfactory:

"X" Grade, a fair song	\$6.00
variety in notes	8.00
"XXX" Grade, extra good in all respects	10.00
The St. Andreashurg stock is now available. We usuall	v have

The St. Andreasourg stock is now available. We usually have a variety in stock. Their price depends on the rolls and notes; \$15.00 to \$20.00 each.

Roller Stock bred from imported birds. Some prefer them to imported. \$10.00, \$12.00 and \$15.00 each.

Females, Dark, also Mixed, \$1.50 and \$2.00 each.

Females, Yellow, \$2.00, \$2.50 and \$3.00 each. Females, Roller Stock, \$3.00 to \$5.00 each.

We pack and deliver to express office, Denver. They usually carry safely anywhere in U. S.

PARCEL POST INFORMATION

THE PARCEL POST rates are as follows: Owing to the convenience of having mail brought to your door by the rural delivery system, it is well to take advantage of the low rates. 20 pounds anywhere within the city limits of Denver for

20 pounds one hundred and fifty miles, 24c; and 1c for each additional pound up to 70 pounds.

Nothing heavier than 50 pounds may be mailed farther

than 150 miles in one package.

ZONE RATES—When it is required that postage be added to the purchase price of any commodity, note the distance you are from Denver, see in which Zone you live. It is then easy to estimate the exact amount of postage required or ask your postmaster.

PRIZE COLLECTION of SEEDS-30 REGULAR 5c PACKETS

Value \$1.50 SENT POSTPAID \$1.00

25 Most Popular Varieties Vegetable Seeds—5 Standard Sure-to-Grow Flower Seeds—Here is the List:

Beans, Stringless Green Pod. The best early round green podded variety. Is perfectly stringless, very productive.

Beans, Golden Wax. This improved strain is yellow and flat pod, stringless; very early.

Beas, Early Alaska. Is positively the earliest and hardiest variety. Smooth seed. Dwarf growth.

Peas, Telephone. Produces large, long pods, well filled with very delicious sweet peas. A leading variety.

Sweet Corn, Golden Bantam. The best and sweetest of all corns. Is exceedingly dwarf and very early.

Sweet Corn, Early Evergreen. Is equal to large Evergreen in quality yet much earlier. Hard to beat.

Beets, Early Blood Turnip. The standard for turnip shape and earliness. Very sweet, and is productive.

Beets, Swiss Chard. Makes best greens and continues to produce fresh leaves all summer. Every home garden should have this healthy vegetable.

duce fresh leaves all summer. Every home garden should have this healthy vegetable.

Cabbage, Early Dwarf Flat Dutch. Medium early, round heads, especially suitable for home use.

Cucumber, Improved Long Green. This variety makes best for slicing and the small size make excellent pickles. Best one variety for all purposes.

Carrots, Danver's Half Long. Is of good orange color, medium size and suitable quality to please all.

Lettuce, Denver Market. Has wrinkled leaves, makes semi-head, Good for early and also for late.

Lettuce, Improved Big Boston. The best head variety, being large and productive. Very popular.

Cantaloupe, Rocky Ford. This popular green-flesh variety is superior to any other cantaloupe grown.

Onion, Danver's Yellow Globe. The standard yellow for home and market. Excellent keeper.

Onion, Large Red Wethersheld. A large flat variety that is sure to produce and mature perfectly.

Parsnip, Hollow Crown. The standard variety, being large, productive and excellent quality.

Parsley, Champlon Moss Curled. A nicely curled leaf variety of medium dwarf growth.

Radishes, Early Scarlet Turnip with White Tip. Very early, tender and beautiful in appearance.

Radishes, French Breakfast. Olive shape with white tip; medium early.

Radishes, Icicle. Long white, medium early and usually very Spinach, Large Leaved Virollay. The best variety for abundant

yield and good quality.

Squash, Yellow Summer Crockneck. This early bush variety is the leader for early use. Best producer.

Turnip, Purple Top Strap Leaf. The most popular for early use;

Turnip, White Egg. For fall and winter use this is the standard and most popular in Western markets.

No garden is complete without a few of the easy growing and popular varieties of Flowers to brighten up the corners. We include Five Very Choice Varieties that are sure to please.

Asters, Branching Varieties, Mixed. You get a good assortment from a leading American grower.

Cosmos, Early Flowering, Mixed. This strain is medium tall; produces popular colors.

Mignonette, Grandiflora. The old favorite, very fragrant and liked by all.

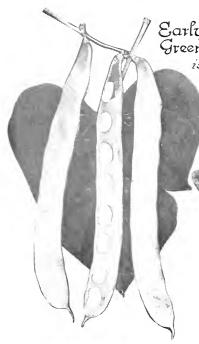

Nasturtium, Dwarf Mixed. This mixture contains all popular shades of large blooms.

Sweet Peas, Spencer Varieties, Mixed. This orchid-flowered type is the perfection of sweet peas.
